

COMMERCE & INDUSTRY. S.G.S. POCOHONTAS CO.

all back of the fair grounds on which to construct an air port, most of the work being done with relief workers, and today we find an aeroplane owned by Carl Sheets of Marlinton making almost daily runs about over the county mostly for pleasure, this plane no doubt is the first aeroplane to be bought in the county. Pocahontas County has many level fields from which aeroplanes can start and land therefore it seems that the use of aeroplanes in Pocahontas County is in its infancy, and it is thought by many that they will replace the automobile to a certain extent. Besides Carl Sheets, Walter Mason is learning to fly, and Z.S. Smith III is in government service, his uncle Thomas Smith lost his life in government training about 1939, giving his life for the advancement of the Aeroplane in private life as well as defense.

Government mail planes pass over Pocahontas County daily and it is hoped that in the near future we will have Air Mail service out of the county.

 Pocahontas County is served by the Pocahontas Telephone Company

under the management of James Bear, their lines covering almost the entire area of the county, with 24 hour service through the Marlinton switch board throughout the county and ~~XXXX~~ out of the county. Keeping this line up requires the services of many laborers, and it is by these lines that the lines of communication are kept going, this has meant a lot to the growth of the county, as both time and money have been saved by use of the telephone.

Commerce & Industry. S.G.S. Hillsboro. W.Va. Pocahontas Co.
portion of the county, and at one time 80% or more of the homes of the County
had a telephone but when the depression came along about 1931 many of them
were taken out or cut off and at the present time most of the phones are few
and in the towns as many rural communities are without telephone service ~~if~~
altogether or only one or two where there use to be from 30 to 40, but due to
the small income of the farmers they were forced to discontinue the service
that they so greatly needed, especially in cases of emergencies.

The two power lines that serve Pocahontas County The West Penn serves
the upper half of the county while The Virginia Public Service serves the lo-
wer portion of the county, this has meant much to the county not only for lig-
hts but the many machines that it runs taking the drudgery out of much of the
work regularly performed by members of the households, this has caused many
electrical appliances to be sold most of which are sold by C.J. Richardsons har-
dware especially washing machines. Radios are found in most of the homes th-
at are serviced by Ralph Dilley and Robert Patterson of Marlinton, with their
radio shops.

So be it said that electricity has meant much to the growth of
the county besides the comfort and enjoyment that it brings.

Commerce And Industry. Samuel G Smith Hillsboro, W. Va. Pocahontas Co.

Pocahontas County has most of our native trees and each year some

of these are shipped to different parts of the state by many of the farmers

living in the region where these small trees are growing and each year these

farmers add to their income by digging and shipping small trees and other sh-

rubbery namely Spruce, Hemlock, White Pine, White & Black Walnut, Quaking Asp, Beech

Birch, Ironwood, Elm, Mountain Magnolia, Yellow Poplar, Sassafras, Sycamore, Crab

Apple, Mountain Ash, Wild Cherry, Yellow Locust, Sumac, Striped Maple, Sugar Maple

Dogwood, Mountain Holly, Red Bud, Rhododendron and Mountain Laurel these are

shipped over the entire state for resetting in many of our larger towns and

cities of W. Va. The income derived from these trees amounts to several thou-

sand dollars each year.

Each year thousands of dollars of Laurel is dug in Pocahontas County

part of this is bought by Frank Lebarr of Strausburg, Pa. who has a nursery at

Little Sulphur Springs, it is dug by local labor and trucked to the nursery and

set out and from the nursery it is dug and reshipped to many parts of the U S

but especially to New York City and other large cities of the east where it is

used by the rich people to be planted in their lawns and with other plants

and trees that make up their shrubbery. Much laurel is bought by tourists pas-

sing through therefore the income derived from the sale of Rhododendron in Po-

cahontas County is great. As it is our state flower Pocahontas County is proud

Marlinton and Academy Mutual Telephone Company

The certificate of incorporation for this company cannot be found on record, but it was organized soon after the Marlinton, Knapps Creek and Dilleys Mill Company, probably late in the year of 1907, for on February 28, 1908 they appointed as their Attorney L. M. McClintic, and it was signed by J. L. McNeel, President, who no doubt was the first president of the company. (Deed Book 43, page 33)

On January 11, 1909 they purchased from the Moncevert Elkins Telephone Company the following assets: "All of the rights and titles to the telephone line beginning at Payne Store in the village of Academy (now Hillsboro) and extend with two wires to the foot of the mountain near Wallace Bend with one wire by way of Lobelia to Jacob together with the branch wires and connections of said line, and all rights and privileges owned by the said party of the first part, for the operation of said line." by G. C. Mohn, President (Deed Book 44, page 207)

This was the only mutual telephone company

the mutual telephone companies came into existence to lower the telephone rates and to make it possible for more people to have telephones. They built the lines at a time when the poles could be gotten from their own wood lots little or no cost. They were organized on a non-profit basis and the stockholders were assessed only enough to offset the actual year to year cost of operation. No money was put into the treasury and held as a capital for the time when the lines needed to be rebuilt, therefore, after around twenty years they found themselves confronted with the problem of rebuilding. They found that they had no money with which to rebuild. The Pocahontas Telephone Company was incorporated and the mutual companies one by one sold their assets to this company until at this time only the Marlinton and Elk Mutual Telephone Company remains in operation as a mutual company.

The mutual companies all used the grounded system telephones, and all of the corporators in these companies were local people who wished to make no profit therefrom. But the telephone, like most of our improvements, was brought by people from out of the country.

At present (1941) the Pocahontas Telephone Company & the Marlinton and Elk Mutual Telephone Company are the only operation in the county. The Forestry Service, however, has about 60 or 70 miles of main pole line in the county with an exchange at Thornwood. Otherwise they have connected through the exchanges belonging to the Pocahontas Telephone Company. The Mutual Company has connection at Marlinton. The three exchanges or switchboards in the county are located at Marlinton, Cass and Hillsboro.

The Pocahontas Telephone Company has raised the amount of Authorized Capital Stock from the original \$15,000. to \$35,000. Their present officials are: E. H. Williams, Pres. S. B. Wallace, Vice-Pres.; and J. M. Bear, Sec. and Treas.

The old Monongahela and Elkins Telephone Company had lines to all of the principal places in the county. From Lewisburg to Marlinton, to Staunton, up through the county to Durbin, and from Marlinton to ...

Crest & Industry Samuel G Smith Hillsboro, W.Va. Pocahontas County
Sandstone both of the cut rock and creek rock type have been us-
ed very in W.Va. and especially in Pocahontas County in building ro-
ugh houses these rock are used for the outer walls, some of these houses
at our state parks.

Much of Pocahontas County's secondary road system is made from
is covered with slate and shale which is found in many sections of
especially at Huntersville and Frost where our best shale is found.
Road from Marlinton to Greenbank is made of gravel known as Chert
taken from the farms of Sherman Gibson at Frost and W.H. Barlow at Hu-
State route 219 known as Seneca Trail between Hillsboro and
is made of limestone this distance is 2 miles and this stretch of road
be the longest stretch of straight road in the state.

Pocahontas County has a sandstone on Droop Mountain that is
less sand remarkably pure sand. Other sand found in the county is not
it has been used very extensively in cement work especially in R.R.

The first tannery or old time Tan Yard of much size was erected

James Smith who came to Pocahontas County from the state of Virginia at

taunton, he having learned the tanners trade there and set out across the

henny mountain for a country suitable for the location of a tannery the

one chose was along the Seneca Indian trail and later became known as Mill

and it was at this point that he stopped rigged up a corn mill and a Tan

ner's yard. This was about 1828 to 30 and the tannery was located between Stamping

and the foot of the hill near the C.M. Wallace residence and it was here

James Smith put into practice what he had learned in Va. as he had learned the

tanners trade there from an old tanner with years of experience.

From this James Smith to 1941 we have had four generations of

tanners. At first we were tanners. Isaac a son of James had a tanyard, his son Edgar followed in his footsteps and he too was a tanner and today we find his son Benton with a

tanney on Route 219 near the Marvin Chapel Church and the Ruckman

crossroads. The building is a cement block structure.

— Tannery —

Chapter 4- Section 4 - Part a.

Tanning was quite an industry from the time of the first pioneer. Great skill was attained by the pioneer in curing the skins so as to make them soft and pliable, that they might be used in making different items of clothing, such as pants, caps, moccasins, and many other things.

The first tannery or tan yard operated by the people of the Greenbank Community was on land in the possession of Jacob Rambaugh, which was prior to 1800. The old tanner's name was Taber. He was a hatter by trade - made fur caps, moccasins, and buck skin pants. His tanning vats were large troughs, and a certain kind of bark, roots and herbs were used in dressing the hides, which accounts for his locating so far in the mountains.

The first tannery or old time tan yard of any consequence where first class upper and sole leather was manufactured was owned and operated by Charles P. Brown, who purchased the James Townsend patent of eighty-eight acres from James B. Campbell in the year of 1850, and erected his tannery that year. He kept the tannery in operation about six years when he sold out and moved across on North Fork where he located.

and O. W. Ruckman formed a partnership under the name Ruckman and Company, and erected the largest old time tannery in the County. At this tannery several hundred would be tanned dressed and finished into first class and upper leather each year for a period of about two years. In connection with the tannery, they made heavy logging harness for the lumber companies. This tannery was on the lands of S. J. Sutton.

Chapter 8 section 2e

The Telephone in Pocahontas County

The coming of the telephone to Pocahontas county was the first quick communication that we had with the busy marts of trade. It antedated the telegraph. The county was connected with the centers by telephone in the year 1898, and that marks the beginning of quick news. I cannot say that it brought any special relief but the citizens of this county are like everyone else, interested in all advancement of science and education. Inside the county, the telephone has been a convenience and a time saver from the time that it was first installed. In the year of 1899 telephone lines were built along all of the principal roads in the county. Now instead of riding to Edray, Huntersville and elsewhere for a doctor which often took many hours of hard riding in the bitter cold weather, he could now be reached in a few minutes by telephone. It has saved many a journey and many a messenger.

In 1898, the telephone had reached the town of Buttonsville, which town also had a railroad and was one of the depots for Marlinton. Marlinton occupied, that year, a peculiar situation in regard to railroad facilities, north it was 46 miles to Autonerville; south 46 miles to Spencerville.

On these was strung a small wire and the line came forward in a very short time. It seemed to take no time at all to connect the two villages, and no time at all to connect our shut in village with the wires that ran all over the world.

A telephone was set up in Squire Uriah Bird's Store and Justice Court room and I got the greatest thrill of my life by holding a conversation with the late Dr. Bosworth, who was in Muttonsville, forty-six miles away. I have believed in fairies ever since. It was a question submitted to the local wise men how a voice could be heard that far, and the most plausible theory was by one of the neighbors in debating how sound could travel through the air instantly. We had all watched a man cutting wood at a distance and noticed that the sound reached us a long time after we saw the ax descend. The theory was that the electric field was like a plank, that when it was pushed forward that both ends moved simultaneously. This seemed to satisfy all of the neighbors who had gathered, 100%, to hear this first message to be heard over the new line.

It will be seen by the date that telephones were in more or less general use long before they reached this county, and like so many of our developments, was done by people outside the county line and of course outside the state line.

The next telephone company to build and operate a line in this county was the Honcevert and Elkins Telephone whose charter found in Deed Book 55 page 15 gives the following information:

Certificate Of Incorporation

September 1, 1903

Principal place of business to be at Marlinton.

Its chief works shall be located in Pocahontas County and other counties.

The capital stock shall be \$10,000 to be divided into 100 shares at a par value of \$100 each.

Pocahontas County

Chapter 5-- Section 3

I learn from some of the writings of Mr. Andrew Price that he had made two visits to the flint quarries or flint pits on Stamping Creek, near Mill Point. These workings are in sight of the State highway known as the Seneca Trail on Mr. Tom Beard's farm about a mile and a half back of his residence, in a fine blue grass pasture. There are several hundred of the pits.

The most remarkable thing is that part of the range that has been called the Rich Garden for the past one hundred or so years. It is a pasture now but Mr. William Beard farmed it for a number of years. Though the land has been plowed many times, the pits are plain to be seen. At first sight it looks like a place that had been a village, where houses had been set close together walls touching, and under each house there had been a cellar. This little hollow owes its great fertility to the disintegration of the limestone, and there can be little doubt but that a large number of boulders or flint nodules were

Pocahontas County

Here was Pocahontas County's oldest industry. The red men as far north as Ohio and Marshall Counties would send their young men here with their spades made from the antlers of deer, elk and moose, staked their claims and worked them and carried back to the flint workers the nodules secured on the expedition.

Peter Lightner was one of the first settlers in what is now Pocahontas County. He was a German-Dutch and came from the eastern part of the state. He settled on Knapps Creek. Prior to his coming, there were no nearer than Staunton which was a hundred miles distant through a trackless wilderness. This was too far to think of going to mill so the people prepared their own corn for bread. The method was simple: a large tree was felled, from which a block or cut was taken, which when placed on end was probably as high as a man's waist. It was placed on end in front of the cabin, then a fire was built upon it and so managed that an inverted cone was formed. From this the charred coals were taken

Pocahontas County

some of the pioneers had to come thirty miles, they considered it an easy task to provide bread. This mill was located on Knapps Creek. Although over a hundred years have passed, yet a portion of the old mill and a trace of the race still remain. Mr. Lightner sold this old mill to John Bradshaw who in turn sold it to Henry Hart. The buhrs are now in an old mill in Highland County, Virginia.

The first tub mill and saw mill in the Greenbrier District was owned and operated about 1800 by the pioneer Wooddells, Probably Joseph Wooddell, the Revolutionary War veteran. A tilt hammer was installed at this mill which was very much needed by the pioneers in making tools and implements of iron and steel.

In the year 1822 Patrick Bruffey purchased from Jacob Gillispie and James Tallman one hundred thirty-four acres of land which was a part of the Thomas Jarvis Grant of four hundred acres. He built a grist mill and a saw mill and carved a mill race out of the hillside more than a quarter of a mile. In connect-

Tilt-hammer.

On January 9th 1835 William Cochran bought 44 acres from John Cackley of Buckeyn or at that time known as Buokeye Cove the deed was signed by William Young, R. Armentrout and John Gilford the Buckleys before William Cackley and William Gibson on April 17 1835 and has two gentlemen to swear them to the papers as Gibson and Cackley in the presence of the peace and was recorded by H. M. Moffett Clerk.

After settling here Bochran went to work to earn a living as a blacksmith decided to put in a Tilt-hammer which was run by power by harnessing Swago Creek, he dug a race from the upper end is known as the Shelton place to the lower end or about opposite Rogers home of today and it was here that he built his Tilt-hammer which he made Horse Shoes, horse shoe nails, rod iron or in fact anything anybody wanted that could be made of ~~it~~ iron and this iron was by wagon and team from where ever he could get it as steel at that time was very hard to get and came in large pieces that required lots of work to get it down.

This tilt-hammer worked from the waterwheel soon as the wheel was turned on the hammer started in a striking manner and with the hammer under you had a heavy striking force, the iron was heated and the hammer in motion all the attendant had to do was turn the iron in the desired position and it was in this manner that the nails and shoes were made, anything else he received an order for and ~~it~~ was his shoes and he bought by farmers from Swago and the surrounding country.

Have been gathering information on this operation for some time and not able to finish until this time.

Calvin Price requested that this powder mill operation be written in for publication in the history.

Commerce And Industry. Samuel G Smith. Hillsboro. W. Va. Pocahontas Co.

1803
Thomas McNeill was born 1747 and died 1803 and was a pioneer
tler in Pocahontas County as he settled on Swago Creek in 1768 and
Mary Hughes, took up what was known as a tomahawk claim from the I
and lived on what is a part of the McClintic farm today (one of my
ants John C Mcneill tells me that Thomas had learned the powder trade
father as it seemed to be a trade carried on by the McNeills even
tland before they came to America, and that as soon as he got located
began to make gunpowder.))

In 1770 Jonathan his son was born and he too learned the po
ie from his father, he married Pheobe Moore the daughter of Moses Moo
y Creek and they put in a Grist Mill at what is now the entrance to
lantic farm, built a stone house where he had a loom that he wove wi
o he made dyes and was noted for his famous Indigo Blue. at the same
out in a powder plant or mill on what is known as the Shelton place.

To make this powder required sulphur, charcoal and saltpeter;
phur he got from Staunton Va. and transported it in to this county on
horses, the charcoal he got from burning willow wood or could use buck
i but not so good, the saltpeter he got was from the salt petre cave
McClintic farm and not far from the residence of Lee Overholt, this
tten from the rich limestone soil found in this particular cave, this
ut in to a hopper like the old ash hopper and poured water over it to
contents and boiled it down and had the finished product salt petre
r this he took the three

- Gun Powder-

on that Thomas furnished gun powder to the soldiers of the Revolution and that Jonathan furnished it for the war of 1812 but G.D McNeill never heard this but it could be.

They sold this powder to the neighbors and traded it for corn meal and it is possible that some of it was traded to the Indians as the powder operation was the only industry in this section at that time.

Jonathan had a loom and wove linsey that was used in the making of dresses and other garments for women, he wove genes for mens shirts and trousers they also wove Coverlets and some of these are found today at the home of John C McNeill a descendant of Thomas and Jonathan McNeill, John spent a great deal of his time in the old stone house experimenting with coloring material and as he was known far and near as the weaver and as well as the man who made gunpowder. A grist mill was run in connection with the powder plant and in his will Oct. 13. 1825 he willed to his wife Phoebe Moore McNeill his grist mill and she had to run it day and night to avoid grinding on the sabbath she was known near and far as the hone miller. John McNeill a son of Jonathan was born 1792 and he too made powder and sold it among his neighbors, so it seemed to be a trade that each generation took up as we have here three different generations that made powder some just for their own use while others made it in quantity for sale and trade with the help of the water power they were able to mix and grind it in quantity and were able to supply the demand at all times.

From all the information obtainable this powder plant was in

Chapter 7

NORTH FORK MILL BURNS

Dear Cal:

Saturday night, March 2nd, 1940, was the time that the North Fork Flour Mill was utterly and completely destroyed by fire. This disaster is considered the most unfortunate of a calamitous nature that has afflicted the Greenbank neighborhood since the days of the Civil War. Mr. J. B. Orndorff owner of the mill had worked in the mill all day without fire. Different persons had passed the mill just after dark and saw no light or fire. The fire was first discovered about 7 p. m., by Clyde Gilliss and Cecil Arbogast who live nearby; the whole inside was a mass of flames when first discovered. In less than a half hours time the whole structure was a mass of ruined machinery, cog-wheels, shafting, fly wheels, and mill stones. The entire loss is estimated at more than \$10,000. The two turbine driving wheels are still in the water deck in regular arrangement. This mill has been the main stand by for the neighborhood for a period of about 60 years. The entire neighborhood sustains a sense of loss and sympathize with Mr. Orndorff in his great loss.

This mill was erected by Uriah Herener, Sr., in the year 1879, on the site of the old Brussey flour mill. Patrick Brussey had erected a flour mill on the same site about the year of 1825 which was driven by an over shot water wheel; he also had an up and down saw mill driven by the same water power arrangement, which had been supplanted by a new saw mill in the 1870's.

In the last few years the mill was operated under the firm name of the

The services of James Elliott was secured to build the mill and with the help of Eldridge Brown and a Mr. Propps did all the carpenter work on the building. Charles P. Brown laid the foundation and did the mason work. The machinery was put in perfect running condition by a millwright by the name of Corann and Robert J. Brown, carpenter helper.

Many different millers operated the mill during the past sixty years. Perhaps Robert N. Gum worked in the mill longer than the other miller.

In keeping up with industry, and in view of the needs of the Greenbank community it may be observed that the old Brussey mill and the Herener mill was a center of industry and had their place of importance in the niche of the history of the Greenbank community.

James Elliott, the master mechanician, of the building was a soldier of the Indian wars; was a private under the command of General George A. Custer, and General Reno. He was with Reno's army when General Custer's Company was massacred in 1876. Mr. Elliott's affidavit was taken by Squire John P. Townsend in 1926 for the purpose of securing a pension for Mr. Elliott as an Indian war veteran. Mr. Elliott died before the papers were ratified and sanctioned by the U. S. Government. Mr. Elliott was a Confederate soldier in the Civil War under command of General Kirby Smith, and Dick Taylor in the South-West. After the war Mr. Elliott worked his way from Mississippi to Iowa, and from there in company with a man named Reynolds, went to the Dakotas on a trapping expedition, and thereby enlisted in Custer's Army.

Broad Ford Sandstone coming from the Jerico Flat and the
near the top of Price hill were used in the Court-House also the
the old covered bridge across the Greenbrier at Marlinton came from
and Kee Flats.

About 1775 John Bruffey came to America from Ireland he learned the stone mason trade before coming to this country and it was his ancestors that did most of the stone work in Pocahontas County latter part of the 17th century and the 18th he and his sons were noted for fine stone work and it was John Bruffey with the assistance of John, Patrick, and Mark that built the rock house for Jonathan McNeel entrance of McClintic Farms on Swago Creek, they lived in the Swago at that time. John Bruffey was a noted stone worker and today you find the tombstones that were erected from 1775 to 1807 were made by him from various parts of the county but the most of them came from Bruffey's. You can find these stones in the McNeel cemetery in the Little Levels a broken doorway.

vied with each other during the past year in demonstrating the possibilities of potatoes as a cash crop in a project sponsored cooperatively by the Upper Monongahela Valley Association, the Monongahela West Penn Public Service Company, and the Agricultural Extension Service of West Virginia University in each of the counties; the Preston County Potato Growers' Association in that county; and the Daily Inter-Mountain newspaper in Randolph.

Fields of growers cooperating in the project were inspected for freedom from weeds and disease and insect injury and for vigor of growth. Acreage and yields were recorded, and the methods used in production including kind of seed used, maintenance of organic matter in the soil and fertilization, and disease and insect control were carefully checked. Methods of harvesting and marketing the crop were also considered, with a view to determining who was entitled to recognition as the Master Potato Grower in each county.

Awards Are Given Winners

Wilbur E. Moore of Mill Point, Pocahontas County; L. M. Beeghley

of Brandonville, Preston and J. Earle Romine Randolph county, were winners and declared Master Growers in their respective. Each received a cash \$25. The Randolph county also received a silver provided by the daily newspaper of Elkins.

Hevener Dilley of and George V. Hannah, placed second and third in Pocahontas county. Roy Durs and Charles C. Knapp of were second and third and second and third place were D. P. Linger and Elkinsville and Leslie V. Montrose.

The Master Potato Project was instituted for the last season in West Virginia with three-fold purpose: (1) to call the attention of growers to good practices in production, marketing, (2) to give recognition to growers doing a good job, to demonstrate the possibilities of supplementing the cash farmers in the state by growing potatoes for market.

COMMERCE & INDUSTRY. SAMUEL G SMITH MILLSBORO, W. VA. POCOHONTAS COUNTY.

TANNING.

Pocahontas County has had tanneries of various sizes operating since the first settlers came here. ^{The Greenbrier Tannery} The Union Tanning Company operating in the Greenbrier Valley under the Greenbrier Tannery began operation about 1901. Their main office was in New York they operated continuously ~~until~~ until 1927 when the original plant burned, however a new and up-to-date tannery was built upon the original site, but it failed to operate and was idle from 1927 until 1941.

Both tanbark and extract was used from 01 to 28 when it was running at capacity, and the daily capacity at that time was about 600 hides and at that time they employed about 150 men both skilled and unskilled with an approximate pay-roll of \$ 120,000 per year. This tannery had a reputation for producing a very fine grade of leather which was known by the trade name "Greenbrier", and was in great demand by the leather industry all over the eastern part of the U S. The finished product was shipped almost entirely to Boston, Massachusetts.

The General manager was S. M. Hench, and today a part of Marlinton

having a contract with the federal government to supply the

thousand pairs of shoes, and at the present time they are

to 150 men and will hire more as they get production start

roll runs about \$10,000 monthly. This pay-roll helps great

new whistle blew for the first time in 12 years the people

surrounding countryside were joyous because they knew Marl

have a pay-roll which is boosting the local markets.

Pocahontas County has another tannery located at

Davis it runs under the name of Pocahontas Tanning Co. and

150. by J.G Hoffman Sr. and J.G Hoffman Jr. J.G Hoffman 3rd a

COMMERCE & INDUSTRY SALMIL G SMITH HILLSBORO.W.VA.POCOHONTA

that are occupied by employees of the Pocahontas Tannery the pre-
of employees is 300 and the average monthly payroll is \$35,000.

The general Manager and Sup't of production is H.M Wid-
ent sup'ts W.W Hoover and H.J Widney, Chemist Arthus N Kay, Chief
C.I Carlson-Accountant W.F Groff assisted by M.M Brown. The presi-
company is J.G Hoffman 3rd he is also treasurer, F.G Howes Vice p-
bright secretary and ass't treasurer,

This tannery has a daily capacity of 3000 sides of sole
which is shipped here from South America, Australia, New Zealand, Can-
ada besides that which is shipped from the many packing centers o-
the entire output of this tannery is made into sole leather which
is cattle hides only that is shipped to all ^{Shoe} manufacturing centers and
the U.S.A besides some is shipped abroad to be used there.

These two tanneries not only furnish employment to sever-
al hundred of Pocahontas County men but this tanning industry located as
such is a market for the surplus commodities of both Fdray and Gre-

Commerce & Industry. S.G Smith Hillsboro.W.Va. Pocahontas Co
so far started and not just along the people of Pocahontas
tanneries have helped keep our much needed rail roads operating wi
borders, from the taxes paid by the employees new roads and schools
built and maintained, which has contributed greatly to the growth o
s our good roads and our beautiful scenery has induced many tourist
through our county and state and they spend much money at different
in the county.

So be it said that tanneries were started in Pocahontas Co
first settlers and are still operating within our borders today.

Marlinton the county seat of Pocahontas County, is beautifully situated at the junction of Knapps Creek and the Greenbrier River, with an elevation of 2,123 feet above sea-level. It is the site of the oldest settlement in Pocahontas County made by Stephen Sewell and Jacob Marlin during the winter of 1750-51 and was known as Marlin's Bottom until 1887. In Dec. 1890 Colonel John T McGraw purchased the farms known as Marlin's Bottom and the Pocahontas Development Company was chartered to promote the town. It offered \$ 5,000. to be applied on a new court-house if the people would change the county-seat from Huntersville to Marlinton which was done by special election and the Chesapeake & Ohio Railway was begun immediately and completed in 1905 and since the completion of the railroad the town has continued to grow.

Located in Marlinton is a High and Graded School two banks The Bank of Marlinton and The First National, the town has two weekly newspapers the Pocahontas Times established in 1889 by the Prices and now edited by ^{2 Marshall} ~~first published~~ 1883 by James B Canfield & Hesekiah C. Price, The Marlinton Journal was established in 1918 and owned by the ~~oxayara~~ publication of Spencer, W.Va. The Greenbrier Tannery of the Union Tanning Co. under the supervision of S. W. Hench operated here for years or until it burned about 1939 was rebuilt but did not operate until 1941 when it was bought by the United States Leather Co., a branch of the International

Commerce & Industry Samuel G Smith Pocahontas County.

MAXIMA date unknown. Hillsboro is located on a broad level plain with an elevation of 2,302 feet being situated in the midst of the finest limestone farming section in the county and is largely supported by the products of these farms and for many years Hillsboro was the educational center of that region and supported the Hillsboro Academy as Hillsboro was known as Academy for many years as it was established in 1842 was incorporated in that year under a charter granted by the state of Virginia the incorporators were the late men Joseph Beard, S. D Poage, Samuel L Mathews, Moses H Poage, John Hill, Thomas Hill, James Miller, and Richard McNeil the first principal was the Rev. Joseph Brown who served for seven years and was succeeded by Rev. M. D. Dunlap who served until the war came on in 1860 and the school closed, after this the county purchased the building for public school purposes, this was the first school of high order in the county and it left its impression upon the education interests of this mountain region as many of our leaders of today received a part of their education at this old academy.

Hillsboro has continued to grow as an educational center as today we find a population of 225 a part of which are people who have moved in for educational advantages as today there is a high school and a graded school.

About 1910 or 11 Edgar H McLaughlin with his brother the late Lee McLaughlin started what was known at that time as a horse show but later developed into the May Fair and it was at this show that some of the best

Commerce and Industry. Samuel G Smith Pocahontas Co.

horses that Pocahontas County ever produced or owned were raced or shown among them was Fair Maiden owned by Robert Burns, Gratten Patch raced by Sandy Arbuckle, Tom Thumb by Lacy Johnson, Dock Blackburn by Pat Gay and many others. McLaughlins operated this fair for 3 or 4 years each year they went to Mt. Sterling Ky. and brought in many fine saddle horses that were sold at public auction. The late George Callison also brought in many fine gaited horses and sold them throughout the county. The last year the show operated was under the management of Dr. Marvin G Smith as he rented it that year. About 1915 this show was moved to Marlinton to lower Camden where they operated for a short time and finally the present sight was bought and a corporation was formed and called The Pocahontas County Fair which we still have with added features to what it was at the start, the management was Dr. S. E. Wallace, John Sydenstricker, L. H. Williams and Z. S. Smith and many others this was all done by public spirited men for the development of our county, and today this fair is looked forward to by thousands of our people and is a homecoming for the ones out of the county and state. Hillsboro is in the center of the many people have called the cup like shaped basin of fertile soil from which has been farmed for several generations from the pioneer to the present time among the first farmers were the following Charles T Beard, Sherman H Clark, Richard T Hill, William Bentek, and others, the first physician was

Rec'd 6----

Commerce & Industry. S.G Smith Pocahontas Co.

As P Bryan and James A LaRue all of these men were born in the early part
the 15th century.

At the time of the breaking out of the war William Curry was serving

as both County and Circuit Clerk and feeling the county records were in
danger the court ordered the records removed to the home of the late Joel

Hill here they remained till 1862 when Mr Curry became alarmed and had them

removed to Covington Va, for safe keeping later to be removed to the resi-

dence of William Clark where they were concealed in a stack of buckwheat

straw and later to the mountains and stored away at the house of a Bapt-

ist minister and at the close of the war court was held in the old Meth-

odist Church at Hillsboro. These men were true to their trust. INK

These accomplishments were made by public spirited men working for
and contributing to the growth of Pocahontas County.

GO. M. CO. & INDUSTRY. SAMUEL G. SMITH HILLSBORO, W. VA. POCOHONTAS CO.

As the timber was cleared the level and more fertile land was taken

for agriculture in Pocahontas County. The land and climate was adapted to li-

vestock farming and so livestock of all kinds was imported from other sec-

tions the greater number being sheep no doubt as they are known as the Gol-

den Hoof KK for Pocahontas County as for many years the sale of wool and

lams has brought more money into the county than any other thing. About the

first sheep brought in by the first settlers was the Merino that has long

been famous for its fine wool as well as mutton qualities, this furnished

wool for the many spinning wheels, carding machines and foot-powered looms, the

Merino was a hardy sheep and well adapted to this county, these were foll-

owed by the Shropshire and Southdown which were not only desirable for wool

purposes but produced fine quality of mutton and today this section of the

Greenbrier Valley produces some of the best mutton lambs that is found in

the state which are shipped to the eastern markets where they are slaughter-

ed and the carcasses dressing out better than the average, the sheep indust-

ry has contributed more toward the growth of the county than any other live-

stock, as we find sheep on 90% of the farms of Pocahontas County that give

great returns two times yearly the wool in the spring and the lamb crop in the

fall, thus making them the most valuable livestock that the farmers of the co-

untry can keep today you find fine flocks of sheep of many different breeds

COMMERCE & INDUSTRY. S.G.S HILLSBORO. POCOHONTAS COUNTY.

Fazing on the hills and in the valles, but not in as great numbers as use to be as the bear that roam the mountainous sections of the county are plentiful and each year they eat and destroy several hundred dollars worth of sheep, some farmers going out of the business others handling only what they can keep in the more thickly populated and close in sections the dogs have played havoc with the sheep industry along with the bear and unless steps are taken to rid the county of bear and strict dog laws the sheep industry in Pocahontas County is on the decline and the peak was reached about 1930 as the government has bought up a large percent of the mountainous section of the county, with no inhabitants thus making this a bears paradise ideal for the sportsman but very hard on the sheep raisers and producers of the county thus a decrease in the sheep industry for which Pocahontas County is noted and gets her greatest cash income from. As sheep thrive on high ground and most of this is government owned the numbers will be less, their lives shorter and a decrease in income to the farmers.

In Pocahontas we find many Registered flocks, namely Hampshires, Dorsets, Cheviots, Southdown Shropshire and Corridales most of these flocks have been established since 1900 and today some of the best flocks of these breeds that are found in the state are found in Pocahontas County and most of these flocks are exhibited at the Pocahontas County Fair, The Greenbrier River Valley

Commerce & Industry. E.G.E Pocahontas Co.

fair and some going to The Richmond State Fair and to Baltimore winning

many prizes. The first Purebred herds established in Pocahontas County were Hampshires beyond a doubt and were brought into the county by F.H McLaughlin and his brother the late Lee P McLaughlin both of Hillsboro and at present we find XX flocks of Purebred Hampshires owned By Ralph Arbogatt of Millpoint, one by F.H Williams and A.C Barlow of Marlinton and one by Monroe Beard at Arbovale, W.A Arbogast of Millpoint has a fine flock of Cheviots, we find Dorsets and Southdowns & scattered throughout the county but the largest flock of Dorsets is owned by A.C Barlow and the most Southdowns are being produced by F.H Williams with S.G Smith of Hillsboro starting a purebred flock of Southdowns, these breeders furnish rams to the many sheep men of the county and state, many of which are sold through the Extension Department at the many ram sales held throughout the state.

Cattle are next in importance in the way of income in the county and we have two types the beef type and the dairy type but the most important at this time is the beef animal as many farmers and cattle men throughout the county produce and sell the finished product found in the 3 year old steer that come from Hereford, Shorthorn and Aberdeen-Angus breeds for which the County is famous, one of the first breeders of Purebred Beef Cattle was the late Richard Callison who bought some Registered Herefords from out of the

Commerce & Industry, S. C. S-Pocahontas Co.
Formerly he was a large livestock farmer on Locust Creek, his work was carried on by his sons E.B & D.W Callison. Today you find Registered herds in many sections of the county where bluegrass grows you will find plenty of fat cattle. The late J.S McNeel of the levels was a pioneer in the Purebred Beef Cattle business as he brought into the county from all parts of the U.S the finest cattle that money could buy at that time and today some of the same bloodlines that these gentlemen brought to the county still exist. Among the breeders of Hereford cattle that were registered are the following men besides the ones above mentioned F.P Kidd breeder of Herefords and Aberdeen Angus, W.C Smith of Hillsboro, A.C Barlow and Chas. Baxter of the Edray section and Howard Hevener of the Greenbank section.

F.H Williams of Marlinton is breeder of Milking Shorthorns these men make up the bulk of the Purebred breeders of Pocahontas County. Each year some of these men exhibit at the Pocahontas County Fair at Marlinton, thus advertising their stock for which they find a ready sale from all over the state.

Many breeders are sold through the calf sale at Marlinton and the best taken to Jacksons Mill to be sold there to the many livestock breeders from over the state.

According to reliable authority the man to which much credit should go to our late county agent C.P Dorsey no he no doubt did more for the

Livestock industry. S.G.S. Pocahontas Co.

as he built up the Livestock Shipping Association, the wool pool, the Farm Bureau to the highest possible peak, as this type of men are needed everywhere so the State Department at Morgantown having noticed his achievements in Pocahontas County and took him to Morgantown to the Extension Department.

It was through his efforts that we have our feeder calf sale annually, the ~~year~~ sale, and more purebred sires on the farms of Pocahontas County.

Commerce And Industry Samuel G Smith Hillsboro W.Va. Pocahontas Co.
Maple sugar and Maple syrup-

The maple syrup industry of Pocahontas County started back in Indian times as we first had the wooden trough burned out by the Indian and

hot rocks were used in these troughs to boil the sugar water down, then the old iron kettle used by the hardy pioneer that first settled in Pocahontas then came along the sugar pan and today we find many of the up to date evaporators in use in some of our larger sugar orchards in Pocahontas County.

Sugar maple trees are found in many parts of Pocahontas especially on the elevated flats and in the many rich coves scattered over almost the entire county. Many old sugar trees found throughout the county bear the mark of many tappings and some in a very crude way as some were tapped by the upward stroke of an ax and in this notch a thin shingle like board was driven this carried the sugar water to the old open trough which was either burned or chopped out of some sort of soft wood namely Poplar, and Cucumber and the troughs made by the Indians were burned out and by the first settlers while the troughs made in the latter part of the 18th century and the ones made at the present time were chopped out with a foot adz many of which are found in some of the older camps throughout the county that are opened each year for these old time spills made from bunch to carry the water from the tree to the trough a cord until it was replaced by the metal spills on which was a leather strap to catch the buckets.

COMMERCIAL & INDUSTRY. SAMUEL G. SMITH HILLSBORO, W. VA. POCOHONTAS COUNTY.

Many sugar camps are tapped each spring throughout the county but most of these are for home use however we find many camps that make both syrup and sugar for sale among them is an up to date camp on Clover Creek Mountain operated by Ligon Coyner of Cloverlick the sugar orchard is on Gov. Arnment land but the camp is on the farm of Berry Coyner this is the largest camp in Pocahontas County and said to be the 3rd largest camp in the United States. They started operation in the spring of 1940 at which time they tapped enough trees to use 6,500 buckets. His equipment consists of an evaporator with the capacity of 20,000 gallons of sugar water extensive pipelines a storage tank or gathering tank) his entire equipment cost between \$4 and \$5,000.00 in this evaporator is what is known as a Hydrometer an instrument for measuring the specific gravity of liquids, also the strength of liquids and by the use of this they are able to make syrup of uniform thickness, color and strength by using this instrument they are able to make a syrup to put on the market meeting all standards of requirements set forth by the government according to Mrs Ligon Coyner 20,000 gallons of sugar water makes about 600 gallons of high grade syrup which they find ready sale as this syrup is bought for fancy trade as they sell the Greenbrier Hotel at White Sulphur Springs 100 or 1000 gallons each year besides what is sold locally to the W. Va. Pulp & Paper Co. at Chase, W. Va. the remainder going to Ohio in bulk in

Circle and Industry Samuel G Smith Hillsboro. W. Va. Pocahontas Co.

Maple Syrup Industry.

barrels, but most of what was sold locally was put up in pint, f gallon and gallon cans all of which brought \$ 2.00 per gallon.

In 1940 they made 500 gallon and in the season of 41 they made

00 and 1000 gallon a part of this syrup was made into fancy pack-

by using small molds of maple leaf and rose design these boxes

in the market for sale on special occasions namely birthday and gi-

for which they receive 80 cents per pound, this is very high grade

ored very fine grain and of excellent flavor for which the touri-

s very fond and according to Mrs Coyner they hope to build up a

his fancy package sugar (or candy). Both 1940 and 41 were bad ye-

season was very short.

Mr. Coyner employs 15 men steady but at times during a heavy run

high as 30 men gathering water, cutting wood and firing the furnace.

very much interested in the maple syrup and sugar industry and hope

to produce in good years from 3 to 5,000 gallons then they hope to

compete with Vermont

and in this way the grain was separated from the straw this was known as
"tramping out" all the grain was threshed in this manner until 1839 when
a machine was introduced in this county by William Gibson of Huntersville,
W.Va. This machine was known as the "chaff piler" this machine was operated
by Jesse Whitmer and John Galford late of Millpoint, the Greenbrier Bridge
was built in 1854-56 by Lemuel Chenoworth of Beverley this bridge has meant
much to the development of Pocahontas County and to the growth of Marlinton
as it is the largest shipping point in Pocahontas County serving a larger
area.

Pocahontas County has had many famous sons in the formation and
growth of the county as N.C McNeill a native son who took to the law prof-
ession in his early years, was one of Pocahontas County's distinguished cr-
iminal lawyer and later represented this district in the State Senate, other
attorneys were Andrew Price, L.M McClintic, F.R Hill who in his later years
served in the legislature, A.P Edgar lawyer and Prosacuting Attorney for a
number of years, in later years Pocahontas has put out new lawyers in J.E Buckley and A.E Cooper who are practicing at this time. Pocahontas County has
two brothers that they should be proud and justly so, in the Sharp brothers,
Summers and George Summers served for 20 years on the bench as Circuit Judge
serving the counties of Greenbrier, Monroe and Pocahontas and in 1936 ran

in an unsuccessful race for governor of the state, while his brother served a term as clerk of the court and later served as Secretary of state.

No man ever lived in Pocahontas County that was more universally loved than the late Squire L Brown who served as clerk of the county court continuously from 1884 until the time of his death 1934 with the exception of a term served by the late C.J McCarty.

DuBois the largest town in the upper Pocahontas was chartered in 1906. is the shipping and mercantile center for the northern end of the county largely built up by the tannery at Frank, Cass a lumbering town below Durbin was brought about by the lumbering industry of Pocahontas County. Greenbank a rural town in an agricultural section was the homes of many of the pioneers of Pocahontas that migrated across the Allegheny's to erect tanneries, grist-mills and the like, as this section is famous for its fine quality buckwheat that was one of the principal crops of our sturdy pioneers.

Pocahontas county produced another favorite son that had much to do with the advancement and progress of the county, this man is George W McClain who has served as Federal Judge of the southern district of W.Va. for a number of years, besides this he is owner of vast farm and grazing lands at Buckeye and on Williams River that produces mulch, cattle and lambs in large numbers.

Peter Lightner was the builder of the first grist mill, this mill was erected on Knapps Creek, this was quite an improvement on the way they had to make meal before that time as up to that time they used the hominy block and the hollowed out log in which they pounded the corn until it was fine enough to bake into bread.

In the early days a man by the name of John Harness began hauling goods from Staunton to Pocahontas County to trade to the settlers for their pelts, venison, ginseng etc. for which they received salt, coffee, powder, lead, and he always carried a piece of calico this trading post was at Huntersville at the cabin of John Bradshaw, from this fact the place became known as Huntersville, a name which it has ever since retained. It was no uncommon thing for the merchants to make from three to four hundred percent on dry goods and near that amount on groceries but shortly the Warm Springs-Huntersville road was built then stores of size and importance came into existence namely Knob Barlow, J.C. Loury & Son, and Loury & Doyle. Here for many years a thriving business was carried on in the harness and saddlery business, first by John Harness then by William Fertig and lastly by William Gross & Son. Before the children of Israel brought ready made clothing to our county tailoring was a good business at Huntersville. James Campbell and John & James Holden turned out a great deal of work, James always gave the shadlers a goodly share of

page 6-----

COMMERCE & INDUSTRY. S.G.S. HILLSBORO. W. VA. POCOHONTAS CO.

business as it was considered good form for the bride to have a new outfit, horse, saddle, and bridle and most of this was made at huntersville at that time.

Jack Tidd, William Dilley and G.W Ginger operated blacksmith shops at Huntersville at different times.

For a long series of years nothing seemed more flourishing than the hostelry business in conjunction with salooning, this was particularly true with one of the largest hotels at Huntersville and was operated succession by J. Williams. John Bussard. John Holden. Porterfield Wallace, I.C Carpenter and F. Campbell but was burned in the fire of 1852. Another hotel operated by William Gibson, John Haines and Davis Hamilton this one was burned during the war.

COMMERCE AND INDUSTRY. SAMUEL G. SMITH HILLSBORO, W. VA. POCAHONTAS CO.

The livestock industry of Pocahontas County is its greatest industry at this time and the money derived from sale of the same is the largest of any industry in the county, much of this livestock is bought by our local livestock buyer and dealer George P. Edgar of Hillsboro who buys and ships cattle and sheep not only from this county but all the adjoining counties.

In traveling through the county on route 219 you will see many herds of beef cattle and many flocks of sheep grazing in the bluegrass that is found so plentiful in the Little Levels section, but today many of these beef cattle are being replaced by their slim sister the dairy cow as many farmers throughout the county have taken to dairying either shipping their cream or selling to a truck from Ronceverte but today dairying is in its infancy in Pocahontas County but should be one of the leading industries in a few years as we have ideal climatic conditions along with abundance of bluegrass pasture and ample grain. Hogs are not as plentiful as in years past due to lack of meat that used to be so plentiful especially before the blight killed all the chestnut trees but today some farmers are specializing in hog raising and on these farms you will find from 100 to 150 hogs being fattened for the eastern markets each fall from grain largely produced at home. Along about 1900 and before hogs roamed the mountains about at will and oftentimes went wild and had to be hunted and killed like the wild hog in ancient times, they made their

living from the woods eating mast, worms, roots and etc. therefore producing cheap meat but times have changed as we have very little mast and very few if any hogs running at large in the mountains.

Pocahontas County ranks high in the production of both poultry and eggs and you find a small flock of chickens on every farm in the county most of which are general purpose or utility chickens but scattered about throughout the county you will find a goodly sized flock of layers and now and then a flock of show birds the latter being exhibited at both the Pocahontas County Fair at Marlinton and at the Greenbrier County Fair near Lewisburg in Greenbrier County. The income derived from the sale of chickens and eggs pays the farmers grocery bills as a general thing. Most of the live poultry going to Philadelphia Pa. and to Baltimore Md. and during the holiday season it is not uncommon to see from 300 to 350 coops of chickens going down on the train this means several thousands of dollars to the farmers of this section each year.

It is very convincing that the livestock industry is the main industry of the county at this time, this being a limestone section and with the lime and phosphate that is being applied in connection with the soil conservation program Pocahontas County will be able to produce more and better livestock in years to come as it always has been a county that produced livestock of a very high quality, but the government program for the farmer will make the land

Commerce & Industry. S.G.S. Pocahontas Co.

more fertile.

Many horses are produced in Pocahontas County, especially the draft or heavy horse as the hard road and the automobile have caused a decrease in the raising of saddle horses, but the tractor has done much to cut down in the numbers of draft horses on farms over the county.

Several flocks of goats are found throughout the county most of which are used in clearing land, as they are great for eating and peeling small and young growth timber and sprouts.

The principal agricultural products of Pocahontas County are corn, oats wheat, hay, potatoes, apples, peaches, grapes and rye in the approximate order named. At the present time the production of Potatoes is getting considerable consideration as it has been found that farmers of Pocahontas County can produce a quality potato equal to the ones shipped in from Maine and other potato producing states of the east, therefore the potato acreage of the county is growing each year and with proper care we have yields of from 400 to 500 bushels of quality potatoes most of which are sold within the state to some of the larger hotels and restaurants, mainly at the Greenbrier Hotel at White Sulphur Springs and at Covington Va. all bringing market price and greatly in demand as these hotels, as they have a trade that demands the best.

Pocahontas County is not a grain county as she does not produce en-

Agriculture And Industry. S.G.S. Pocahontas Co.

With wheat to bread her therefore she has to depend on outside supplies for flour. Today you find Hybrid corn growing in many sections of the county where it used to be impossible in the days of our pioneer ancestors to get any ~~old~~ corn to ripen at all, and this had to be on low land near the river, but today corn ripens in any part of the county. Much of the corn raised in Pocahontas is put in silos for winter feeding. Oats are the principal crop of the mountainous sections of the county where it is rather cool the summer through as they do well in a cool climate, the same as potatoes therefore the Williams River and Cranberry sections are good for potatoes and oats, and have been since the county was first settled.

COMMERCE AND INDUSTRY. SAMUEL G SMITH POCOHONTAS COUNTY.

One of the sacred duties resting on the living is to preserve mem-

ties of worthy citizens that have gone on before, and they from a rough

wild nurse land, whose crops were men. The Shawnee Indians preceded the pi-

oneers in Pocahontas County with the actual use of hunting grounds, their

warriors were buried by their tribes in many localities of Pocahontas County

these were mounds or Indian graves which are found near Buckeye and on Elk

River then came the pioneers that were buried in a different manner as they

were buried in home made caskets then came the modern funeral director with

the factory built casket and the modern funeral home. One of the first to han-

dle caskets was A.R Smith of Hillsboro who is near 90 years old he had the

horse drawn vehicle then there came to Pocahontas County another Smith that

took up the same work his name is Z.S Smith Sr, assisted by his son Clarence

they have an up to date place in Marlinton taking over most of the work in

the county, as A.R Smith was forced to quit on account of advanced age. Walla-

ce & Wallace have a branch at Cass with J.B. Sutton in charge.

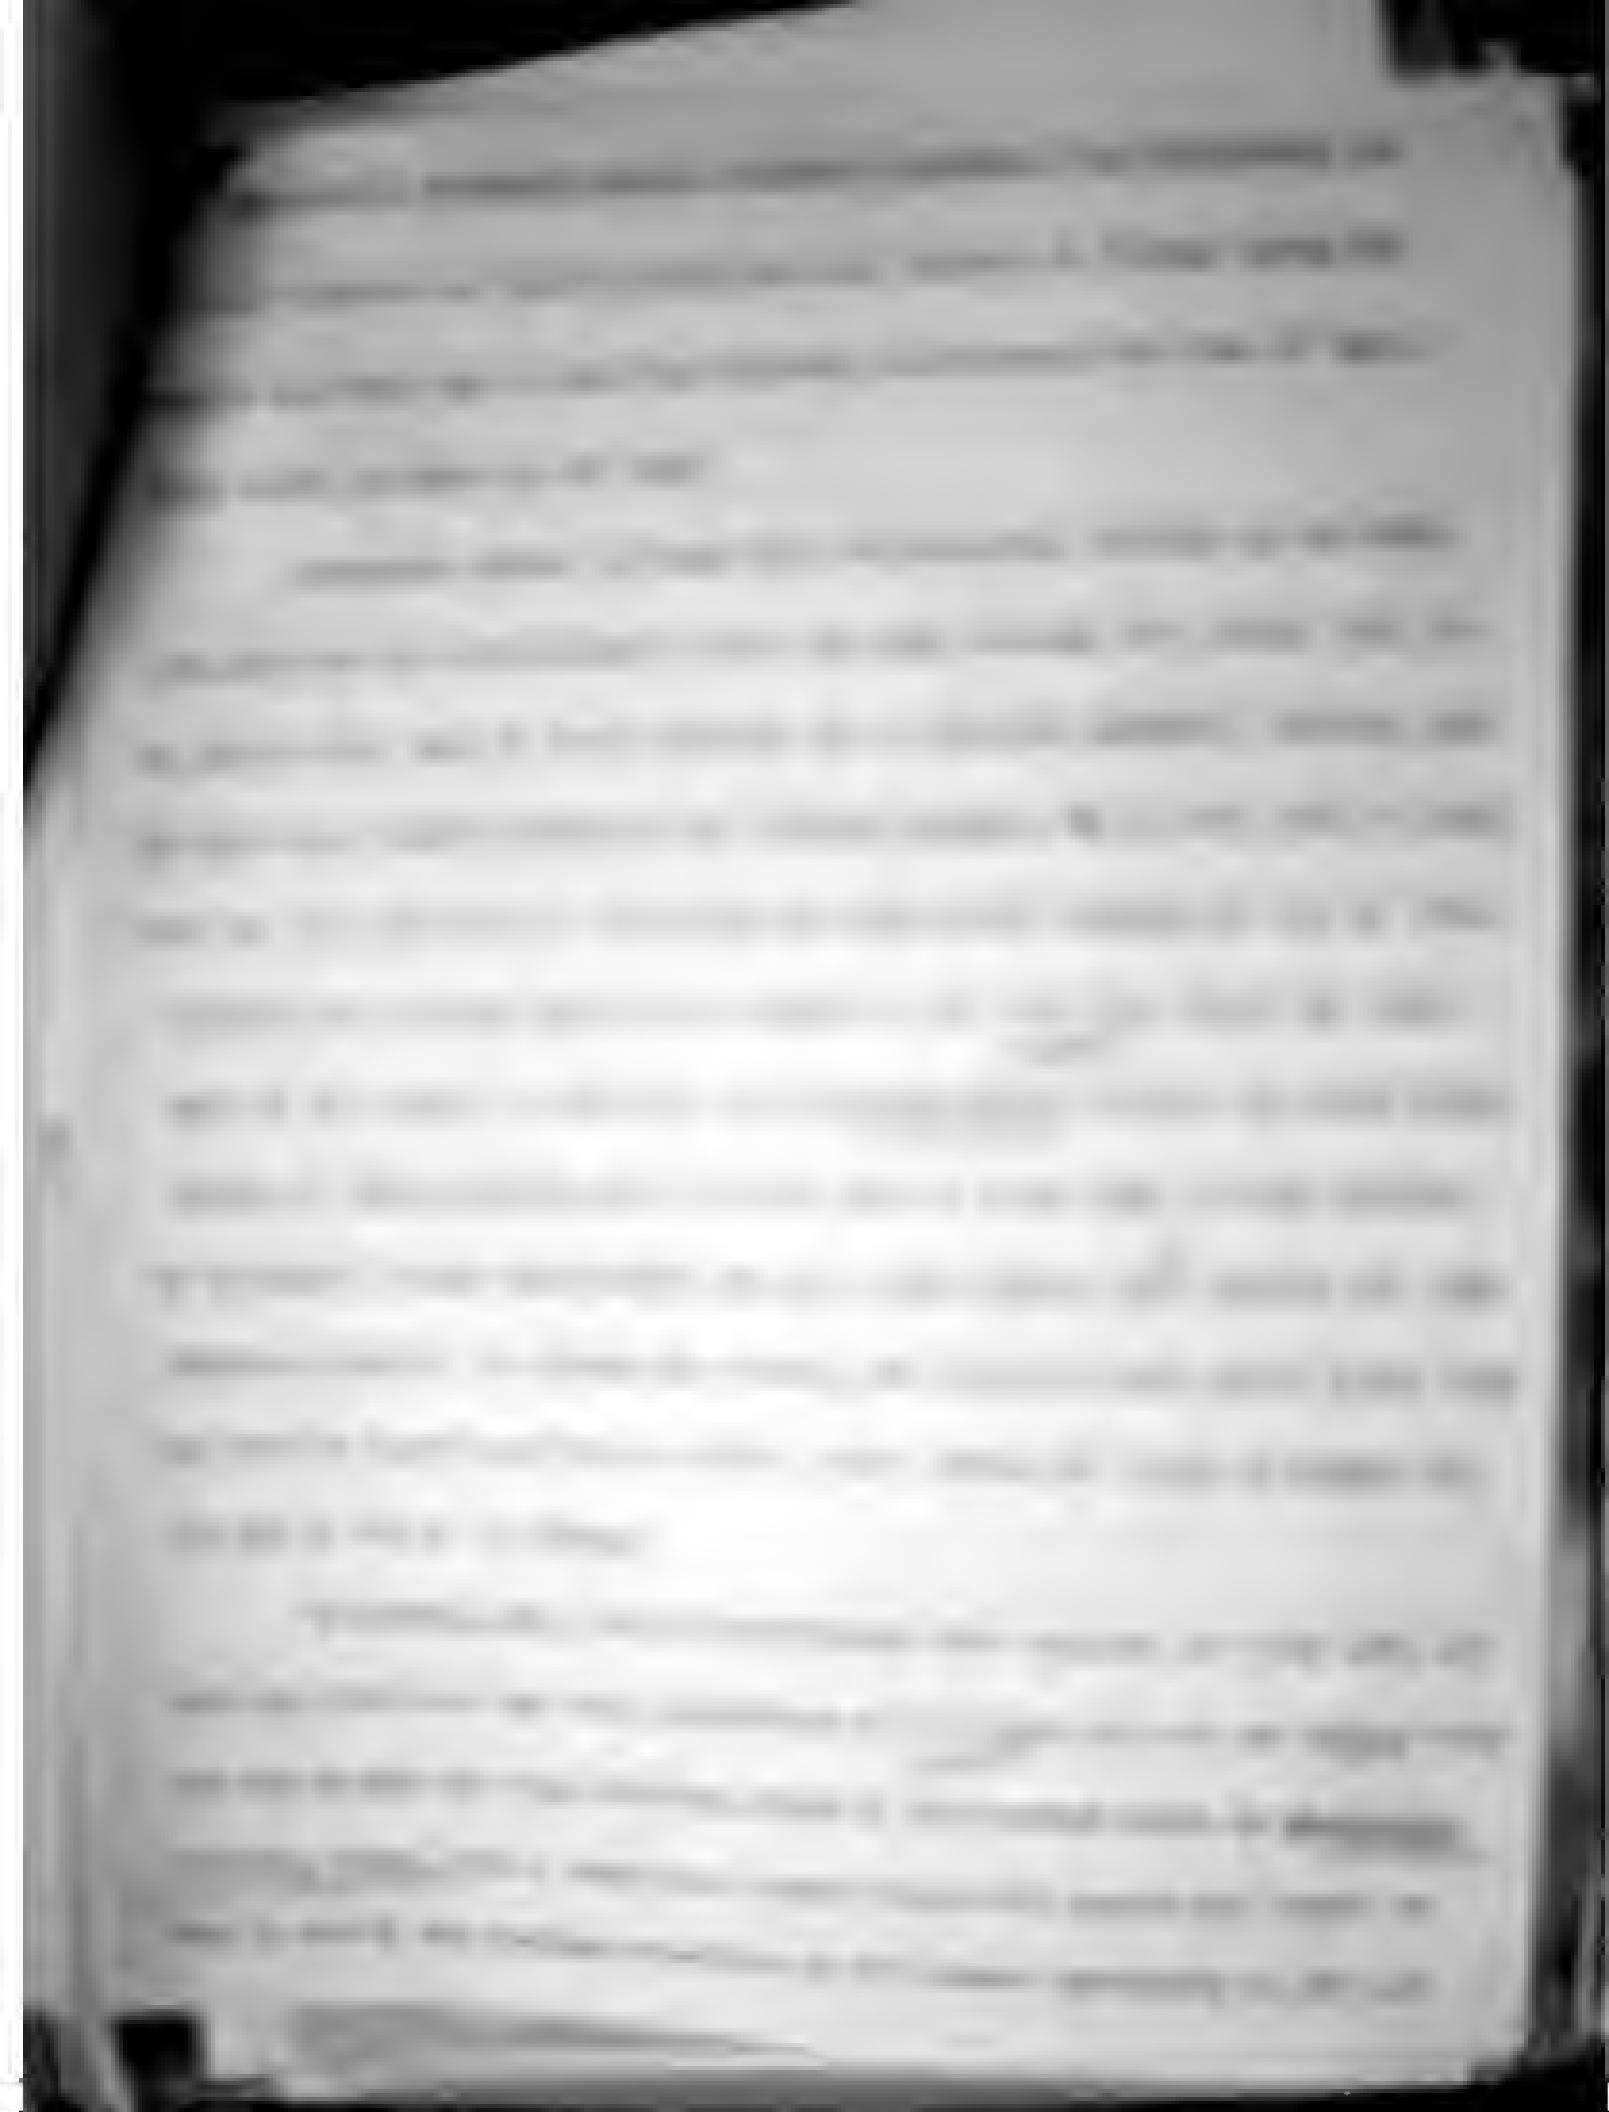

Most if not all the caskets used in the mountainous sections of

the county were made by carpenters and cabinet makers namely Washington

Perry and W. Dorman at Buckeye A.R Smith at Hillsboro and many others th-

roughout the county all this lumber was cut on the old up-and down mills

and the first circular mills that came into the county. Some of our cemet-

COMMERCE & INDUSTRY. SAMUEL G. SMITH HILLSBORO, W. VA. POCOHONTAS CO.

Citys were started as family plots, some the results of Indian raids, the largest and best kept is Mt. View Cemetery overlooking the town of Marlinton which is owned by the town.

Pocahontas County is known as a recreational section as tourists from all over the United States visit and pass through the county each year and to take care of these tourists out in natures paradise tourists cabins have been erected along all the leading highways ~~KK~~ so they will be away from the heat and noise of the citys and towns, these cabins are lit by electricity the northern part of the county by the West Penn while the lower part of the county is served by the Virginia Public Service you find these cabins on Droop Mountain, made of pine logs at Droop Camp filling station, at Hillsboro George Bartholomew has up to date cabin just outside the town limits, at Buckeye W.W. Graham has cabins some finished with native stone that are cool in summer and warm in winter other cabins are found on Knapps Creek and on Elk at L.D. Sharps.

In getting away from the sweltering heat requires ice cold soft drinks and these are made and distributed by T.J. Mason and his son Walter they own and operate the only bottling works in the county known as Marlinton Bottling Works, with a large and a small truck they supply the county as this is one of the leading industries of the county especially in the hot

COMFORT & INDUSTRY. S.G.S. HILLSBORO. POCOHONTAS CO.

SUMMER MONTHS, and Wilbur Sharp makes ice cream that is sold locally and in his place of business.

George Bartholomew owner of The Feed Bag, that serves meals, sells gasoline and oil and has a number of cabins, Mr. Bartholomew is a wood worker and cabinet maker as he has a work shop in the rear of the filling station where he makes all sorts of furniture and novelties made of wood, inlay work by many designs and many kinds of wood, these articles find ready ~~for~~ sale as the tourist trade buys his entire output consisting of fancy tables, table lamps and many other oddities made of wood that is produced here in Pocahontas County, sales from his products run high especially during the tourist season.

Handicraft is rather undeveloped in Pocahontas County as the county produces barks suitable for weaving baskets and other novelties that are made from bark, this could be made one of the leading industries of the county, but due to lack of weavers of knowledge in weaving it is undeveloped at the present time. Incomes of considerable size could be made during the summer or tourist season by selling craft made from bark along our main highways and at filling stations located throughout the county. Pocahontas has many old antiques and each year antique dealers from out of the state buy what they can in the way of corner cupboards, desks, tables, chairs, wooden bed stands, old spinning wheels, stone ware and many other articles used by our forefathers, some

COMMERCE & INDUSTRY, S.G.S. POCOHONTAS COUNTY.

It here in this county have rooms furnished in old antiques. The Prices

Anna Hunter, T.S. McNeel and Mrs. Dr. McCutcheon are gatherers of this

in the county. Much of which is exhibited at the Pocahontas County

fair in the old time exhibits which attracts more attention than any other

exhibit, all articles made of wood are made from black walnut or cherry from

the W. Va. hills in Pocahontas County, these articles are cherished very much

by their owners as they played a very important part in the building and

growth of the county as many of these articles and furniture were used by

the first settlers of Pocahontas County and have been in use all down through

the years. In talking to some of our older people and discussing these

old relics they say they bring back recollections that are very dear to

them as their parents and grandparents used these articles when they sett-

led the wilds of old Pocahontas.

So be it said that these articles so highly cherished today were
the implements and furniture around which started the growth of the county.

are much like an onion, each spring these are dug and sold to the people of
the towns also to people from sections that do not produce them, they are con-
sidered a delicacy by many people and each spring many so called Ramp reunions
are held throughout the county and state.

Much fruit is produced in Pocahontas County C.J Richardson owns what
is known as the fruit farm which is located near the Greenbrier River above
Marlinton, this orchard consists of from 40 to 50 acres of trees and each year
this fruit is picked and sold locally in and around Marlinton another orchard
of size is found on the McClintic Farm on Swago Creek near Buckeye the acreage
in trees is from 35 to 40 acres the fruit is sold locally.

Pocahontas County produces Cranberries on Cranberry River this section
located in the western part of Pocahontas was once known as the Wilderness or
Wilds of Pocahontas this glade is cut up into smaller ones namely the big glade
the Glade, Long Glade, Round Glade and Little Glade with a total acreage of 100
acres but truly this just one big glade containing from 250 to 300 acres of deep
soil overgrown in some places with a thicket of shrubbery and others carp-
ples and vines. There is perhaps no area of equal extent in W.Va. which is of gr-
ater importance for its influence on water flow nor one more interesting to the
naturalist and collector on account of its varied forms of plant and animal life
The Cranberry River laying at an elevation of 3,400 above sea level at
the Cranberry River, each fall these Cranberries are either by hand

Commerce & Industry Samuel G Smith Hillsboro, W. Va. Pocahontas County.
from different sections of Pocahontas County as well as by some from out-
side of it, some are sold and when put away in the moss from the glades will
keep a considerable length of time this section was once in one of our dense
and undisturbed forests but was cut over by Warm Lumber Co. and since been
bought by the state and put into a national forest and game reserve as this
section has much game as well as trout fishing streams save for the timber
the resources of this section are undeveloped and with the Marlinton, Millpo-
int to Richwood road that has been and is being built by the federal govern-
ment by federal prisoners it is hoped this section of Pocahontas will be op-
ened up in the near future and its resources developed.

Pocahontas County has many fish streams the larger streams having
both large and small mouth bass and Pike while the smaller streams have both
Brook and Rainbow Trout along with the Brown Trout in some streams to keep
these streams stocked a Fish Hatchery was built between Edray and Onoto just
below the old McHughlin Spring and here thousands of trout and other fish are
hatched and fed to a certain size then they are distributed throughout this
section of the state in our local streams, because of its fine fishing streams
and good fishing many of the outdoor and sporting class visit Pocahontas
each year.

Our rugged mountains, covered with a great variety of trees, shrubs
and vines, combining with swift, pure mountain streams, scores of large

Commerce And Industry. Samuel G Smith Hillsboro. W.Va. Pocahontas Co.
lime springs and numerous fairyland caverns affords us scenic grandeur
unparalleled and should be recognized as another of our most important nat-
ural resources.

If these resources are wisely developed and wisely utilized which
incidentally is true conservation, the people of Pocahontas County will have
a bright and prosperous future.

NOTE

①

COMMERCE AND INDUSTRY. SAMUEL G. SMITH HILLSBORO, W. VA. POCOHONTAS CO.

The first county court of Pocahontas County convened March 1822 at the house of John Bradshaw those qualifying were John Jordan, William Poag, James Tallman, Robert Gay, George Poag~~X~~, Benjamin Tallman, John Baxter and George Burner a little later on John Jordan became the first sheriff of the county under a \$30.000.00 bond with Abraham and Isaac McNeel as his bondsmen, Josiah Beard was appointed clerk of the court his work speaks for itself and Sampson L Mathews was recommended and appointed as surveyor of lands, William Hughes was appointed constable of Little Levels and James Cooper was appointed constable for the upper end of the county now Greenbank District. Travis W Perkins opened up a house of entertainment thus he became the first hotel proprietor in Pocahontas County.

The first term of court convened on May 7, 1822 and the first grand jury that ever sat in a body for Pocahontas County were the following persons Samuel Daugherty, foreman, John Mooney, George Key, John Johnston, Joseph Fred, James Grimes, James Bridger, Samuel Waugh, Henry Herold, James Lewis, John Grimes, Morris Hughes, William Blair, Andrew D Edmiston, Samuel Hogset, James McNeel, William McNeil, John Moore, Lanty Lockridge, Jonathan Griffin, and Abraham Seaborg, these fine old gentlemen paved the way for our present court.

Pocahontas County was named for the daughter of a Powhatan, her real name was Pocahontas, she was born about the year 1595, about 1612 she was visiting

was chief of the Potowmack Indians, and it was at this time she was enticed her on board a boat and she was taken away by captain Agall and so she met and married John Rolfe.

The first man to carry a compass in the Greenbrier valley was John Lewis, and the first settler in Little Levels was Col. John McNeel who came to this country thinking he had killed a man in the Maryland-Virginia section but after locating in Little Levels and erecting a cabin and out hunting he came upon Charles and James Kinnison from where the fight took place and informed him the man had not died and in fact not seriously wounded, this was great relief for him and he began to open up the vast wilderness that later became the garden spot of Pocahontas County, these men and their wives were buried in the McNeel cemetery just north of Hillsboro.

Huntersville the county seat for many years was laid out in 1821 and shortly boasted of two general mercantile stores, the county buildings, a hotel a postoffice and one news paper the Pocahontas Times all of which were moved to Marlinton which became the county seat in later years.

The first settlers in Edray District was Marlin and Sewell who erected a cabin near the present site of Greenbrier Bridge in 1749 this location grew until today we find a town of near 1,600 population.

In the early days grain was threshed both by the flail and by the riding of one horse and the landing of one or more that were freshly shod

will be able to supply it to the rest of the state where laurel does not grow.

.3

Pocahontas County ranks high in the production of evergreens and each year many of these are cut at Christmas time and trucked to the towns and cities of W. Va. and sold as Christmas trees of these the Spruce is the most desirable, they are found on high elevation especially on Cheat Mt. Spruce Knob, Black Mt. and many other sections of high altitude mostly found on the Northwestern part of the county, many of our little Spruce find their way to Charleston about Christmas time.

Pocahontas is noted for its wildflowers coming early in the spring and staying until late in the fall many of these are dug each year and sold to wildflower lovers over the state. Many of the rich woodlands of Pocahontas grow Ginseng and Golden Seal these two plants in years gone by were the means of living for many of our mountain people as thousands of dollars worth of these roots were dug each year in the wilds besides the tame and cultivated patches that were found scattered over the county the ginseng is mostly sent to ~~China~~ where it is said it is made into medicine other plants and roots are gathered each year and shipped to herb plants that use them in making medicine, H. C Cole now located at Hillsboro and formerly of Matewan, W. Va. was an herb doctor that used many of our plants of Pocahontas County medicine.

Many of the sections of Pocahontas County produce hemp, a plant
